

CR338-UTC

Experience Driven Protection

Innovative Catalyst For Your Needs

The future is here with Vanguard's newest innovation, and it is somewhere you want to be! The CR338-UTC offers a cost-effective option while being completely adaptable to the future of security technology, making this a worthwhile investment. The CR338-UTC's low-profile pedestal highlights your top devices on a sleek and modern display. It's minimal footprint makes more room

for additional devices to be featured. This solution can be equipped with inductive charging and a cut-resistant cable. The CR338-UTC's flexibility and durable light tether retractable 30" cord reel provides a unique customer experience to the store. Utilizing IoT, the data integration and connectivity are limitless and can be tailored to fit your store's needs.

Product Flexibility

Not only can the CR338-UTC rotate the device 360°, but it's low-profile pedestal emphasizes the products, and enhances the overall customer experience.

The CR338-UTC is developed for adaptability to future technology, including data integration and connectivity. Further solidifying it's flexibility in a store environment.

Quick Release

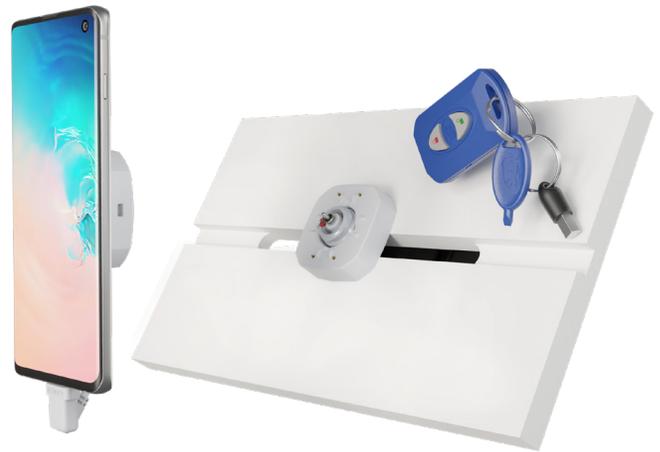

The CR338-UTC features Quick Release for sales associates to offer an untethered customer experience, and it's convenient for quick nighttime storage.

In a matter of seconds, store associates can quickly remerchandise a position with new product.

IR Keyfob

VPG's IR Keyfob is the most cost-effective key available in the industry. Stores can arm and disarm the CR338-UTC within two feet of the alarm unit to give store associates touchless control.

Hassle-free solution to offer increased efficiency on the sales floor.

Phone and Tablet Compatible

The CR338-UTC is compatible with smartphones and tablets. Even the larger iPad Pro can be fully secured with the same pedestal, sensor and brackets.

Display your phones and iPads right next to each other with the same minimalistic display.

Cut-Resistant Cord Reel Cable*

The cut-resistant cord reel gives customers the flexibility to interact with the secured mobile device, while providing a more durable cable.

The gentle pull tether makes for a true user experience by allowing customers to test out the various functions of the secured mobile device.

Bracket Compatibility*

2-Arm and 4-Arm brackets compliment the sensor and serve as a deterrent to theft.

The brackets will not scratch the device and protect it from being damaged.

Inductive Charging*

For the latest innovative phones and tablets that hit the market, the CR338-UTC features an option to be equipped with Inductive Charging. Store associates can offer customers an enhanced user experience.

The Inductive Charging option will be used without the bracket feature and power coupler.

IoT Technology*

The CR338-UTC includes an optional feature for IoT Technology. It will be a platform-based program that allows for limitless connections and provides layered data viability. It can be adaptable to anything and is able to be tailored to customized store needs.
