ENCORE V2

POWER PLUS PROTECTION X5.

Secure up to five devices at once! Did you say five? Yes, your eyes didn't deceive you. The EnCore v2 has five ports! It can secure various products, from the newest smart watches, to the hottest-selling electronics and accessories. With EnCore's new discreet design and the ability to choose from multiple sensor options, you can fit the EnCore v2 perfectly to your store's layout.

Multi-Port Protection

Use the additional sensor ports to increase the user experience in the store. With 5-ports, you can secure a whole display with just the EnCore v2!

Convenient Cross-Selling

Display complementary products next to each other! You have the ability to pair merchandise or brands that go together, such as securing a tablet, stylus, and keyboard all in one go.

Low-profile Design

See the product, not the protection! The EnCore v2 is designed to blend into any store layout and let the devices speak for themselves.

Power & Alarm

Equipped with a 5-volt power supply, the EnCore v2 can power and alarm the devices it is connected to.

Back-up Battery

If there is a power surge, the back-up battery will automatically turn on. It will continue to alarm but WILL NOT power the devices. The battery life lasts for 3-5 days.

SmartTime Keyfob

Arm and disarm the EnCore v2 remotely to give store associates touchless control. If Keyfobs are lost or stolen, you can simply reprogram the EnCore v2 to accept only the new security code.

Time-Out Feature

For enhanced protection, a lost or stolen keyfob has the option of timing-out after a set duration and will need to be reset at the SmartTime Base Station to control the security again.

VPG™
90+ dB Alarm

Protect your accessories with our state-of-the-art compact alarm system.

The 5-ports are compatible with all VPG alarming sensors. The ultrafast alarm will trigger whenever the merchandise is removed from the sensor.

Easy Installation

Simple and quick steps to install and remerchandise the EnCore v2.

Installing is as simple as plugging in the sensor to the EnCore v2 and the product, then inserting in the power supply. Choose where you want the EnCore v2 to go and adhere it to the surface.

Mounting Security

If you want a more secure EnCore v2, in the installation process, you have the option to screw the security down to the display fixture.

Diverse Sensor Options

A variety of sensors are available for wearables, electronics, and accessories.

The sensors are designed to be as discreet as the EnCore v2, letting the merchandise be eye-catching to attract customer engagement.

IR Extender

For better convenience, install the IR extender!

If the EnCore v2 gets tucked away in a tight area, use the extender to easily access the receiver so you can arm or disarm the alarm. Similar to the EnCore v2, the IR extender can get installed above or below the counter.
